How to watch weblectures from within Blackboard
The instructions that follow only apply to Internet Explorer; as far as we have been able to test, other browsers like Firefox, Safari and Chrome do not exhibit any problems.

To watch weblectures from within Blackboard use one of the following options.1

Option 1: open link in new window (or tab)
In Blackboard: right-click on weblecture URL > Open Link in New Window/Tab

Option 2: configure security settings
a. Open Internet Explorer.
b. Go to menu Tools > Internet Options > tab Security.
c. Select Trusted Sites and click on button [Sites].

1 Option 1 is the easiest of the two and requires no configuration, but has to be repeated every time you want to watch a weblecture. Option 2 requires a few configuration steps, but has the advantage of being a once–only change.
d. Type ubvu.vu.nl in the box Add this website to the zone: Please check that the option Require server verification (https:) for all sites in this zone is not selected.

![Trusted sites window](image1)

e. Click on button [Add] to add ubvu.vu.nl to the Trusted Sites.

f. Repeat steps d. and e. to also add bb.vu.nl to the Trusted Sites.

![Trusted sites window with additional sites](image2)

g. Click on button [Close] to close the window Trusted sites.

h. Click on button [OK] to close the window Internet Options.
