

Medical Natural Sciences MSc

Vrije Universiteit Amsterdam - Faculteit der Exacte Wetenschappen - M Medical Natural Sciences - 2012-2013

Structure of the training

The Master's programme of Medical Natural Sciences offers three different variants for graduation:

- Research variants (O - variant)
 - Medical physics
 - Physics of Life
 - Molecular Clinical Diagnostics
 - Medical physiology
- Society oriented variant (M - variant)
- Communication variant (C - variant)
- Education variant (E - variant)

Schematic overview of the Master course Medical Natural sciences (in cp):

Variant	O	M	C	E
Compulsory courses (Major)	27, 30 or 36	18	18	18
Research project (Major)	39	30	30	30
Literature study	6 or 12	6	6	6
Minor programme (obligatory in O-variant)	21	-	-	-
Internship (e.g. at a company)	-	30	30	-
M or C projects	-	30	30	-
High school teacher education	-	-	-	60
Ethics	3	3	3	3
Writing a scientific article	3	3	3	3
Optional program O-variant, for example - Deficiency courses - Extension research project - Extension literature study - extra courses	12, 15 or 18			
Total (cp)	120	120	120	120

Inhoudsopgave

Communication variant	1
Individuele vakken	1
Courses for Communication Part	1
MSc Biology, Communication Specialisation	1
Students can opt for an internship of 30 credits (EC), or for a combination of an internship of 21 credits and a thesis of 9 credits.	1
Students can opt for a selection of modules from this group. The following modules are compulsory: - Research Methods (AM_470582) - Science and Communication (AM_470587)	2
MNS courses for C-E-M variant	2
Courses in track Molecular Clinical Diagnostics (C, E or M-variant)	2
Compulsory choice (18 ec track specific)	2
Compulsory Courses	3
Courses in track Medical Physics (C, E or M-variant)	3
Compulsory choice (18 ec track specific)	3
Compulsory Courses	4
Courses in track Medical Physiology (C, E or M-variant)	4
Compulsory choice (18 ec track specific)	4
Compulsory courses	5
Courses in track Physics of Life (C, E or M-variant)	5
Compulsory choice (18 ec track specific)	5
Compulsory Courses	6
Compulsory choice for all tracks	6
Education variant	6
Individuele vakken	6
Courses for Education Part	6
Leraar voorbereidend hoger onderwijs in Natuurkunde verplicht	7
Leraar voorbereidend hoger onderwijs in Scheikunde verplicht	7
MNS courses for C-E-M variant	7
Courses in track Molecular Clinical Diagnostics (C, E or M-variant)	8
Compulsory choice (18 ec track specific)	8
Compulsory Courses	8
Courses in track Medical Physics (C, E or M-variant)	9
Compulsory choice (18 ec track specific)	9
Compulsory Courses	9
Courses in track Medical Physiology (C, E or M-variant)	10
Compulsory choice (18 ec track specific)	10
Compulsory courses	10
Courses in track Physics of Life (C, E or M-variant)	10
Compulsory choice (18 ec track specific)	11
Compulsory Courses	11
Compulsory choice for all tracks	11
Research Variant Medical Physics	12
Individuele vakken	12

Minor Research Project MNS	12
Optional courses (18 ec compulsory)	13
Colloquium / Literature thesis MNS	13
Colloquium / Literature thesis (1 out of 2)	14
Optional Colloquium Literature study (free choice)	14
Recommended elective Courses	14
Master Research Project MNS	14
Compulsory Courses	15
Compulsory choice for all tracks	15
Research Variant Physics of Life	15
Individuele vakken	16
Minor Research Project MNS	16
Optional courses (12 ec compulsory)	17
Colloquium / Literature thesis MNS	17
Colloquium / Literature thesis (1 out of 2)	17
Optional Colloquium Literature study (free choice)	18
Deficiency courses	18
Master Research Project MNS	18
Compulsory Courses PoL	19
Compulsory choice for all tracks	19
Research Variant Molecular Clinical Diagnostics	19
Individuele vakken	20
Minor Research Project MNS	20
Optional courses	20
Colloquium / Literature thesis MNS	21
Colloquium / Literature thesis (1 out of 2)	21
Compulsory choice Colloquium / Literature study (extension to 12 ec)	21
Deficientievakken	22
Master Research Project MNS	22
Compulsory Courses	22
Colloquium / Literature Thesis, 12 e	23
Compulsory choice for all tracks	23
Research Variant Medical Physiology	24
Individuele vakken	24
Minor Research Project MNS	24
Optional courses (18 ec compulsory)	25
Colloquium / Literature thesis MNS	25
Colloquium / Literature thesis (1 out of 2)	25
Compulsory choice Colloquium / Literature study (extension to 12 ec)	26
Deficientievakken	26
Master Research Project MNS	26
Compulsory Courses	27
Compulsory choice for all tracks	27
Society Oriented Variant for Medical Natural Sciences	27
Individuele vakken	27

Courses for Society Oriented Part	27
MSc Biology, Societal specialisation	28
MNS courses for C-E-M variant	28
Courses in track Molecular Clinical Diagnostics (C, E or M-variant)	28
Compulsory choice (18 ec track specific)	29
Compulsory Courses	29
Courses in track Medical Physics (C, E or M-variant)	29
Compulsory choice (18 ec track specific)	29
Compulsory Courses	30
Courses in track Medical Physiology (C, E or M-variant)	30
Compulsory choice (18 ec track specific)	30
Compulsory courses	31
Courses in track Physics of Life (C, E or M-variant)	31
Compulsory choice (18 ec track specific)	31
Compulsory Courses	32
Compulsory choice for all tracks	32
Vak: Advanced Cardiac Diagnostics (Periode 3+4+5)	32
Vak: Advanced Medical Technology (Periode 5)	33

Vak: Vakdidactiek Scheikunde II (Semester 1, Semester 2)	87
Vak: Verdieping (Semester 1, Semester 2)	88
Vak: Voortgezette Biostatistiek (Periode 4)	88

Communication variant

In addition to the courses below a total of at least 18 ECTS of track specific courses has to be chosen in consultation with the master coordinator.

Opleidingsdelen:

- [Individuele vakken](#)
- [Courses for Communication Part](#)
- [MNS courses for C-E-M variant](#)

Individuele vakken

Courses for Communication Part

To complete the Master programme (120 credits) of the Communication Variant, the student has to choose 60 credits Communication courses.

Opleidingsdelen:

- [MSc Biology, Communication Specialisation](#)

MSc Biology, Communication Specialisation

Biology is increasingly becoming an interdisciplinary research field in which biological scientists can no longer function effectively in isolation. Rather, they benefit from interaction with other scientists (such as those in the fields of molecular biology, biotechnology and ecology) and societal actors (such as farmers and policy makers, in the field of ecogenomics). Communication about science takes place between academic peers and between scientists and the general public. This makes the Communication specialization a complex and dynamic field of research and practice. The Master's graduate with this specialization has a theoretical understanding of the complex problems that arise during such communication processes, and has developed the necessary skills to act professionally at this interface to enhance communication and the outcomes of communication between scientific actors and society. The programme for the Communication specialization has a study load of 54 EC. While most courses are taught in English, those that focus specifically on the Dutch context and media are taught in Dutch.

Opleidingsdelen:

- [Students can opt for an internship of 30 credits \(EC\), or for a combination of an internship of 21 credits and a thesis of 9 credits.](#)
- [Students can opt for a selection of modules from this group. The following modules are compulsory: - Research Methods \(AM_470582\) - Science and Communication \(AM_470587\)](#)

Students can opt for an internship of 30 credits (EC), or for a combination of an internship of 21 credits and a thesis of 9 credits.

Vakken:

Research Variant Medical Physics

In addition to the courses below a total of 12 ects is available for optional courses. These credit points can also be used to extend major project, minor project or literature study.

In case of deficiencies these courses are not optional but will be prescribed by the master coordinator.

Every programme, including the choice of optional courses, has to be discussed and agreed upon with the master coordinator and approved by the Examination Board.

Before starting the Major Research Project or the Minor Research Project at least half of the track specific courses have to be completed.

MNS courses for C-E-M variant

MNS courses for C-variant. In overleg met de mastercoördinator worden er 60 ec MNS vakken van de gekozen specialisatie gevolgd.

Opleidingsdelen:

- [Courses in track Molecular Clinical Diagnostics \(C, E or M-variant\)](#)
- [Courses in track Medical Physics \(C, E or M-variant\)](#)
- [Courses in track Medical Physiology \(C, E or M-variant\)](#)
- [Courses in track Physics of Life \(C, E or M-variant\)](#)
- [Compulsory choice for all tracks](#)

Courses in track Molecular Clinical Diagnostics (C, E or M-variant)

Opleidingsdelen:

- Compulsary choice (18 ec track specific)
- Compulsory Courses

Compulsary choice (18 ec track specific)

Vakken:

Naam	Periode	Credits	Code
Bio-analysis & Clinical Diagnostics	Periode 1	6.0	X_432765

Advanced Cardiac Diagnostics

Vakcode	M_CCARDIA09 (3120004)
Periode	Periode 3+4+5
Credits	3.0
Voertaal	Engels
Faculteit	VUmc
Coördinator	dr. J.G.F. Bronzwaer
Lesmethode(n)	Hoorcollege, Werkgroep
Niveau	500

Doel vak

This course focuses on an update in different cardiac image modalities to quantify myocardial perfusion and myocardial function in coronary

artery disease and cardiomyopathy.

Inhoud vak

- MRI, PET/CT, Intracoronary FFR/CFR
- Echocardiography diagnostic and therapeutic
- Cardiac Resynchronisation Therapy and Two Stage procedure
- Literature study

Toetsvorm

Written exam. In addition, students will receive their credits only when they have participated in the classes and also have fulfilled all requirements.

Literatuur

Syllabus including relevant articles.

Intekenprocedure

Students can register for this course and examinations via vunet.vu.nl (under My study, register for courses and exams). The general VU registration rules apply. Information on registration deadlines can be found in VUnet. Please note that the general VU rules are strict, both for booking of the classes and (resit-)exams.

Advanced Medical Technology

Vakcode	X_437026 (437026)
Periode	Periode 5
Credits	6.0
Voertaal	Engels
Faculteit	Faculteit der Exacte Wetenschappen
Coördinator	prof. dr. ir. R.M. Verdaasdonk
Docent(en)	prof. dr. ir. R.M. Verdaasdonk
Lesmethode(n)	Hoorcollege
Niveau	400

Doel vak

Understanding the physical principles of medical equipment in view of a safe and effective application.

Inhoud vak

The course consists of an overview of various medical devices discussing the physical principles and mechanism of action when used with a patient. The understanding of the physics contributes to the safety of the patient and the way the device can be applied most optimally. Particular devices will be discussed like electro-surgery, lasers, ultrasonic knives, endoscopes, etc. Also recent research and new developments of instruments will be shown.

Onderwijsvorm

Combination of lectures, practical hands-on with medical equipment, short projects of practical and literature research, oral project presentations.

Toetsvorm

Presentations and written report.

Literatuur

Will be announced.

Doelgroep

mMNS, mPhys

Overige informatie

Students should also register in advance for this course on Blackboard.

Algemene didactiek en Pedagogiek I

Vakcode	O_MLADEPI ()
Periode	Semester 1, Semester 2
Credits	6.0
Voertaal	Nederlands
Faculteit	Faculteit der Psychologie en Pedagogiek
Lesmethode(n)	Hoorcollege
Niveau	500

Doel vak

De student kan algemene onderwijskundige en pedagogische inzichten op het terrein van (activerende) didactiek (rol van ontwerper), communicatie in de klas (rol van uitvoerder) en gedrag- en leerproblemen (verdiepende module) vertalen naar de eigen lespraktijk.

Inhoud vak

Deze module kent 4 onderdelen:

- de startweek (1 erts), waarin de student kennis maakt met de opleiding, met het basisinstrumentarium van een docent en de eigen startcompetenties in kaart brengt;
- colleges ten aanzien van de rol van Ontwerper en de rol van Uitvoerder;
- colleges over gedrag- en leerproblemen, waarin problematiek en aanpak van meest gangbare gedrag- en leerproblemen aan bod komen.

Onderwijsvorm

Colleges (hoorcolleges en werkgroepen)

Toetsvorm

- beoordeling van het portfolio
- tentamen over de colleges gedrag- en leerproblemen

Literatuur

Een literatuurlijst wordt verstrekt aan het begin van de opleiding

Vereiste voorkennis

Dit vak is alleen te volgen als onderdeel van de universitaire lerarenopleiding

Overige informatie

Voor alle onderdelen (startweek, rollen, verdiepende module) geldt een aanwezigheidsplicht

Algemene Didactiek en Pedagogiek II

Vakcode	O_MLADEPII ()
Periode	Ac. Jaar (september), Semester 1, Semester 2
Credits	3.0
Voertaal	Nederlands
Faculteit	Faculteit der Psychologie en Pedagogiek
Docent(en)	B. Klein, dr. M. Dobber
Lesmethode(n)	Hoorcollege

Doel vak

De student kan:

1. leerlingen, als individu en als lid van de groep, ondersteunen en stimuleren in hun verdere persoons- en identiteitsontwikkeling;
2. de voorbeeldfunctie ten opzichte van leerlingen vormgeven en daarop reflecteren;
3. leerlingen helpen bij de voorbereiding op hun rol in de samenleving als actief participierend burger;
4. deze en eerdere verworven competenties aantonen in een showcaseportfolio

Inhoud vak

Deze module kent 2 onderdelen:

- colleges ten aanzien van de rol van Pedagoog;
- het werken aan de rolopdachten voor het showcaseportfolio;

Onderwijsvorm

Colleges (hoorcolleges en werkgroepen) en zelfstudie

Toetsvorm

- een tentamen betreffende de rol van Pedagoog
- beoordeling van het showcase portfolio, waarin de student de verworven competenties ten aanzien van alle rollen aantoont

Literatuur

Een literatuurlijst wordt verstrekt aan het begin van de opleiding, en staat op Blackboard bij de betreffende studieonderdeel

Vereiste voorkennis

Dit vak is alleen te volgen als onderdeel van de universitaire lerarenopleiding

Overige informatie

Voor de colleges geldt een aanwezigheidsplicht. Studenten die dit vooraf met de vakdidacticus/mentor overeengekomen zijn, kunnen in zelfstudie onderdelen afronden.

Analysis of Governmental Policy

Vakcode	AM_470571 ()
Periode	Periode 1
Credits	6.0
Voertaal	Engels
Faculteit	Fac. der Aard- en Levenswetenschappen
Coördinator	prof. dr. J.T. de Cock Buning
Docent(en)	prof. dr. J.T. de Cock Buning

Lesmethode(n)	Hoorcollege, Werkgroep, Computerpracticum
Niveau	500

Doel vak

- To acquire critical knowledge regarding different policy models and theories
- To master the correct use of central concepts in political and policy discourses.
- To further deepen your analytic skills with respect to the critical assessment of a complex societal question or dilemma in the health and life science;
- To learn to integrate science- specific knowledge with the knowledge and skills of other disciplines of the social sciences
- To practice skills in data collection and analysis
- To learn to set up valid lines of argumentation;
- To learn to translate research findings into policy recommendations;
- To get experienced in writing a policy advisory report;
- To improve your communication skills;
- To improve your skills in working effectively in a project team, through team building, team analysis and feedback.

Inhoud vak

Governmental policy affects millions of people and is thus object of intensive debate and target of strong societal forces, like political parties, media and interest groups. Being an advisor or policy maker requires a thorough understanding of the dynamics of policy making, as well as from the psychological side as from the more social structures and their influence on a deliberative democracy.

The course contains several lectures on theoretical concepts and models concerning policy analysis. Furthermore you will be challenged, under supervision, to apply and practice these concepts and models in the project assignment. From the very first day, you will be part of a project team of about ten students. You are confronted with a real policy problem from an external commissioning institution (e. g. a non-governmental organization, a Ministry, an advisory council). Within those 4 weeks you will collect data by literature review and interviews and conduct an interdisciplinary analysis on the basis of which you provide an advice. Specific attention is paid to working in a project team and team building. At the end of the course, you prepare an advisory report. On the last day of the course you present the report to the representative of the external institution who commissioned the project. In that presentation your team will highlight the main results of your analysis and defend the recommendations you propose.

Onderwijsvorm

Lectures, Training; Project assignment

Toetsvorm

Written exam (25%) and individual evaluation based on personal performance in the project team (50%), and assessment of various group products (report and presentation (25%)). Exam has to be passed successfully.

Literatuur

Buse, Mays and Walt: "Making Health Policy"

Doelgroep

Compulsory course within the Masterprogramme Management, Policy Analysis and entrepreneurship for the health and life sciences (MPA) and the Societal differentiation of Health, Life and Natural Sciences Masters programmes.

Overige informatie

The case is policy analysis and advice, but the exercised methods and skills are equally applicable to strategic marketing advice or evaluation studies. The project integrates the learned lessons from the first two compulsory MPA courses: Qualitative & Quantitative Methods.

Bio-analysis & Clinical Diagnostics

Vakcode	X_432765 ()
Periode	Periode 1
Credits	6.0
Voertaal	Engels
Faculteit	Faculteit der Exacte Wetenschappen
Coördinator	dr. H. Lingeman
Docent(en)	dr. H. Lingeman
Lesmethode(n)	Hoorcollege
Niveau	400

Doel vak

Giving a clear account on the instrumental bio-analytical techniques and strategies in bio-analysis and clinical diagnostics.

Inhoud vak

This basic course on bio-analytical and clinical chemistry is focusing on decision trees (strategic decisions) that can be used during the method development and optimization of analytical procedures to determine both endogenous and exogenous compounds in complex biological samples. Approaches and procedures with respect to sampling, sample preparation, separation, spectroscopy, electrochemistry, as well as immunological and enzymatic procedures will be dealt with. Case studies will be used to clarify the decisions that have to be taken.

Literatuur

Biomedical Modelling and Simulation

Vakcode	X_430112 (430112)
Periode	Periode 1
Credits	6.0
Voertaal	Engels
Faculteit	Faculteit der Exacte Wetenschappen
Coördinator	prof. dr. G.J.M. Stienen
Docent(en)	dr. I.H.M. van Stokkum, prof. dr. G.J.M. Stienen, dr. ir. T.J.C. Faes, dr. J.C. de Munck

Lesmethode(n)	Hoorcollege, Werkcollege, Practicum
Niveau	400

Doel vak

To gain knowledge of the most important theoretical and practical concepts in modelling and simulation of biomedical processes at different scales, ranging from macroscopic organ function, cellular function down to biochemical interactions and signaling pathways within cells.

To gain experience with and to apply MatLab and Mathematica to acquire, analyse and evaluate biomedical signals and to model and simulate biomedical processes.

Inhoud vak

This course will start with a general overview the various types of models used to describe biomedical processes by parametric and non-parametric models using linear and non linear (differential) equations. Basic knowledge of vector and matrix calculations and differential equations is required but will be refreshed.

During the course, attention will be paid to finite element models, spectral analysis, compartment models, algorithms used in image analysis and models to describe molecular structures and their dynamic behaviour.

Examples will concentrate on cardiovascular function: finite element models to describe wall motion, image analysis of PET and Echo data, viscoelastic models of pressure volume relations, compartment models of the interaction between contractile proteins to simulate force and pressure development and a description of an ion pump for instance to import Ca-ions into the cell during an action potential.

The introductory lectures will be combined and followed by practical courses in which, through exercises, experience will be gained of MatLab and Mathematica (4th generation computer languages). Finally students will be offered a choice of 1 out of 5 modelling problems to be solved in groups of 2 or 3 students each, guided by a supervisor. At the end of the course each group will present and discuss their work with all participants and supervisors of the course.

Onderwijsvorm

Lectures, working groups, assignments.

Toetsvorm

Assignments, presentation and final written exam. The overall score will be calculated as the weighed average of the scores for the assignments, presentation and written exam.

Literatuur

Syllabus.

Book (recommended): Gilat, A., MatLab: An Introduction with Applications 4th ed, Wiley.

Course registration at the UVA is compulsory at least 4 weeks before the start of the semester via <https://www.sis.uva.nl>

Biophotonics I: Microspectroscopy

Vakcode	AM_470629 ()
Periode	Periode 3
Credits	3.0
Voertaal	Engels
Faculteit	Fac. der Aard- en Levenswetenschappen
Coördinator	dr. ir. Y.J.M. Bollen
Docent(en)	prof. dr. ir. E.J.G. Peterman, dr. ir. Y.J.M. Bollen
Lesmethode(n)	Hoorcollege
Niveau	400

Doel vak

To introduce students into various spectroscopic and microscopic techniques.

Students should know the theoretical principles and the applicability in life sciences of:

- absorption spectroscopy
- fluorescence spectroscopy
- light microscopy
- fluorescence microscopy

Inhoud vak

Optical spectroscopy and microscopy are widely used in cell biology and biophysics. In this course the principles of many of these techniques, including absorption spectroscopy, various types of fluorescence spectroscopy (e. g. polarization, FRET) and fluorescence microscopy (e. g. confocal, TIRF, lifetime imaging) are explained. Their application in modern biophysics and cell biology research is illustrated by a

number of (guest) lecturers.

Onderwijsvorm

Lectures, discussions, self study

Toetsvorm

Oral presentation and written exam

Literatuur

Notes, handouts and papers

Doelgroep

MSc students Biology, Biomolecular Sciences, Biomedical Sciences, Medical Natural Sciences, Physical Sciences, Chemistry or related

Overige informatie

Due to largely overlapping contents this course is NOT intended for students who have taken the FEW BSc course "Microscopische beeldvorming (X_420529)".

Practical training in the techniques discussed here is offered in Biophotonics 3, for which Biophotonics 1 is required.

Biophotonics III: Practical Training

Vakcode	AM_470630 ()
Periode	Periode 3
Credits	3.0
Voertaal	Engels
Faculteit	Fac. der Aard- en Levenswetenschappen
Coördinator	dr. ir. Y.J.M. Bollen
Niveau	400

Doel vak

To introduce students into the application of various optical techniques, mainly fluorescence spectroscopy and microscopy.

Students should be able to:

- plan and conduct experiments using optical techniques
- evaluate results on the basis of theoretical knowledge and recent literature
- present their results in short reports and one journal-style paper

Inhoud vak

Optical spectroscopy and microscopy are widely used in cell biology and biophysics. In this course students will obtain hands-on experience with absorption spectroscopy, fluorescence spectroscopy (e. g. FRET and anisotropy) and fluorescence microscopy. The theory behind these techniques is already given in Biophotonics 1, which is required to enter this course. Small groups of students will prepare the experiments, discuss them with the lecturer and carry them out. The group will write a short report on each experiment and one journal-style paper.

Onderwijsvorm

Experiments, instructions, self-study.

Toetsvorm

Participation during labwork and discussion (individual; 30%); written report (per group; 70%).

Literatuur

Reader (5 euro)

Papers and protocols that will be made available through Blackboard

Vereiste voorkennis

Biophotonics: Microspectroscopy (AM_470629) or Microscopische beeldvorming (X_420529) are required to enter this course.

Doelgroep

MSc students Biology, Biomolecular Sciences, Biomedical Sciences, Medical Natural Sciences, Physical Sciences, Chemistry or related.

Overige informatie

The theoretical background of the techniques used here is discussed in Biophotonics: Microspectroscopy (AM_470629).

Business Management in Health and Life Sciences

Vakcode	AM_470584 ()
Periode	Periode 2
Credits	6.0
Voertaal	Engels
Faculteit	Fac. der Aard- en Levenswetenschappen
Coördinator	prof. dr. H.J.H.M. Claassen
Docent(en)	prof. dr. H.J.H.M. Claassen
Lesmethode(n)	Hoorcollege, Computerpracticum
Niveau	500

Doel vak

To acquire insight in different legal entities in which to organise a company or enterprise

To get acquainted with:

- financial and legal aspects
- patents and alternative valorization methods
- marketing and sales aspects of businesses

To acquire insight in Human Resource Management models

To get acquainted with different models of financing

To learn to think and act in line with economic and sustainability issues for the company

Inhoud vak

Increasingly, health students will be confronted with a corporate way of thinking in health organisations. To function in such an environment it is critical that students have basic knowledge of fiscal and legal entities and organisational forms of corporate structures (including start-ups). Furthermore, they have to understand what motivates decision makers and financial officers in different companies (also geographical differences). This course comprises a theoretical and a practical part. The theoretical part consists of interactive classes with various experts from the field. Topics that will be dealt with in detail include: intellectual property, portfolio management, finance,

risk capital, grants and subsidies, team building and people management, different legal entities, fiscal and legal aspects when starting a new company, SWOT analysis in the life sciences and clinical trials. The practical part consists of bringing the knowledge acquired during the classes into practice in an assignment in which you develop a (personal career) businessplan.

Onderwijsvorm

Lecturers, self study, assignment.

Toetsvorm

Written exam and assessment of the (personal career) business plan. Both parts need to be passed.

Literatuur

To be announced on Blackboard

Doelgroep

Optional course for Master students Management, Policy Analysis and Entrepreneurship in Health and Life Sciences (MPA), Societal differentiation of the Health, Life & Natural Sciences.

Chemical Biomarker Diagnostics

Vakcode	X_432520 (432520)
Periode	Periode 4
Credits	6.0
Voertaal	Engels
Faculteit	Faculteit der Exacte Wetenschappen
Coördinator	dr. F. Ariese
Docent(en)	dr. F. Ariese
Lesmethode(n)	Hoorcollege
Niveau	400

Doel vak

Acquiring a deeper insight into the basic principles and modern developments in bioanalytical chemistry and spectroscopy; understanding their role in biomarker detection and monitoring.

Inhoud vak

The topics discussed comprise modern analytical chemistry techniques, with an emphasis on spectroscopic techniques and their molecular specificity for the detection of biomarkers in a biomedical setting. These techniques can be used to help detect certain diseases, or can be applied to monitor a patient's response to treatment. Important parameters such as sensitivity, selectivity and specificity will be discussed, as well as possible future developments.

Onderwijsvorm

Lectures and tutorials; a short practical may be part of the course. Students will also give a presentation on a recent scientific publication

Toetsvorm

Written examination; project report.

Literatuur

Book chapters and handouts will be provided by the lecturer.

Vereiste voorkennis

BSc level background in analytical chemistry; Principles of Molecular Clinical Diagnostics course

Doelgroep

mMNS

Clinical development and clinical trials

Vakcode	AM_470585 ()
Periode	Periode 3
Credits	6.0
Voertaal	Engels
Faculteit	Fac. der Aard- en Levenswetenschappen
Coördinator	W.S. Konijn MSc
Docent(en)	prof. dr. H.J.H.M. Claassen
Lesmethode(n)	Hoorcollege, Computerpracticum, Werkgroep
Niveau	500

Doel vak

To acquire knowledge and insight into the role and objectives of drug and clinical development process

To acquire knowledge and insight into the clinical pharmacology in drug development, drug interactions, pharmacodynamic and metabolic interactions

To acquire knowledge and insight into clinical study methodology

To acquire knowledge and skills into the regulatory principles

To acquire knowledge of ICH-GCP and quality

To acquire knowledge and insight into clinical trial coordination

To acquire knowledge and skills into the data management and statistics.

To acquire insight into the ethical aspects

To acquire insight into actual use of clinical trials in R&D strategies

To learn to design a clinical study

To acquire insight into the different epidemiologic study designs

To acquire knowledge and skills into how exposure and disease in a population can be measured and how the relationships between them can be assessed (using SPSS)

To acquire knowledge and skills into interpreting and presenting the results of an epidemiologic study

Inhoud vak

The need for rigorous evaluation of components of health care is increasingly recognised worldwide. An important type of evaluation is the clinical trial. The most commonly performed clinical trials evaluate new drugs, medical devices, biologics, or other interventions on patients in strictly scientifically controlled settings, and are required for regulatory authority approval of new therapies. This course aims to provide students with a theoretical and practical understanding

of the issues involved in the design, conduct, analysis and interpretation of clinical trials of health interventions. Furthermore classes are provided on which the actual use of clinical trials in day to day R&D strategies within industry and universities is addressed in detail. Classes include: 'Life Cycle of a Clinical Trial', 'Clinical Trial Methodology', 'ICH-GCP Principles', 'The Ethics Committee', 'Safety Considerations in Clinical Trials', 'Quality Control & Quality Assurance', 'Compliance, Misconduct & Fraud'.

An additional week of basic epidemiology will help you to complement the knowledge obtained so far in the course with an understanding of the principles of other types of study designs (cross-sectional, longitudinal, case-control). Issues concerning exposure and disease measurement and exposure-disease relationships will be discussed in detail, and examples will be provided. Together with your colleagues, you will learn how to apply this knowledge first by hand (during the lectures), then to an epidemiologic database (during the computer-based sessions) and how to interpret the results critically.

Onderwijsvorm

Lectures, case study and self study (clinical trials weeks). Lectures, group work in computer-based sessions and selfstudy (epidemiology week).

Toetsvorm

Individual assessment through a written exam

Literatuur

To be announced on Blackboard

Doelgroep

Optional course for Master students Management, Policy Analysis and Entrepreneurship in Health and Life Sciences (MPA), Societal differentiation of the Health, Life & Natural Sciences.

Communication, Organization and Management

Vakcode	AM_470572 ()
Periode	Periode 2
Credits	6.0
Voertaal	Engels
Faculteit	Fac. der Aard- en Levenswetenschappen
Coördinator	dr. J. Maas
Docent(en)	dr. H. Wels, dr. J. Maas, prof. dr. F. Scheele, dr. M.B.M. Zweekhorst
Lesmethode(n)	Hoorcollege, Werkgroep
Niveau	500

Doel vak

- To get acquainted with theories on organisational behaviour
- To obtain a deeper understanding of communication from the perspective of sharing and influencing results
- To acquire knowledge on organisational structures and designs
- To get acquainted with important theories on organisational transitions and change management
- To acquire insight into different management practices in the health and life sciences sector
- To gain insight in leadership and interpersonal behaviour
- To obtain insight in methods for motivation and conflict management
- To improve communication skills
- To practise analytical and advisory skills

Inhoud vak

Organisations in the health and life science sector are changing fast, a phenomenon driven by newly emerging technologies and increasing societal complexity. A growing number of students with a beta degree will hold professional and managerial functions in these organisations. During this course students will learn how to be effective performers within these environments, both individually and in teams. This requires an understanding of the macro aspects of organisational behaviour, including designing organisations, managerial skills and ways of strategic thinking. Several speakers conduct lectures on aspects as motivation, managing interpersonal behaviour, leadership, communication and developing and changing organisations. The speakers explain theories from literature and relate them to their practical experiences. In addition, the students interview managers in health organisations and analyse these interviews using the newly acquired theoretical concepts. Also, practical cases of health care companies will be analysed and discussed, resulting in advisory reports for management. With the other

students you discuss your experiences and a coach helps you relate the experiences to theory.

Onderwijsvorm

Lectures, self study, training workshops project assignment

Toetsvorm

Written exam (60%;) and assessment of the interviews, case study analysis, and reports (40%). Grades of both parts must at least be 6 or higher.

Literatuur

To be announced on Blackboard

Doelgroep

Compulsory course within the Master programme Management, Policy Analysis and Entrepreneurship for the Health and Life Sciences (MPA) and the Societal differentiation of Health, Life and Natural Sciences Masters programmes

Overige informatie

Attendance to training, workshops, interviews and discussions is indispensable

Disability and Development

Vakcode	AM_470588 ()
Periode	Periode 2
Credits	6.0
Voertaal	Engels
Faculteit	Fac. der Aard- en Levenswetenschappen
Coördinator	dr. W.H. van Brakel MD
Docent(en)	M.E. Mulder-Cornielje, F.M. Budge MSc
Lesmethode(n)	Hoorcollege, Werkgroep
Niveau	500

Doel vak

To develop an understanding of disability and the issues faced by people with disabilities

To develop knowledge and skills for disability research, policy development and management related to disability, rehabilitation and development

To acquire insight into the epidemiology of disability, with separate attention for important determinants like gender, poverty and HIV/AIDS

To learn how to use relevant models of disability and the conceptual framework of the International Classification of Functioning, Disability and Health (ICF)

To understand the importance of human rights in relation to disability and to learn to use the UN Convention for the Rights of Persons with Disabilities for advocacy and other rights-based interventions

To acquire skills and knowledge in measurement and research methods relevant to disability

To understand the importance of inter-sectoral collaboration

To gain insight in participatory approaches

Inhoud vak

The Disability and Development (D&D) course focuses on a broad range of issues related to disability and rehabilitation in the context of development. This means that the focus is on people with disabilities in low and middle-income countries. Disability affects an estimated 600 million people worldwide, the majority of whom live in low and middle-income countries. The large majority are poor and have no access to rehabilitation services; neither are facilities in place to allow them to be included in the mainstream of society. To date, very few services and programmes are available to address these needs. The realisation that the Millennium Development Goals cannot be met without addressing the needs of people with disability has brought a new impetus to the field concerned with these issues, disability and development. Another major recent development was the adoption of the UN Convention on the Rights of Persons with Disabilities in December 2006. It is expected that there will be a substantial increase in demand for training of a large variety of professionals (e.g.

researchers, managers, architects, lawyers, health professionals) with formal training and qualifications in the field of disability and development. This rapidly increasing interest in disability as a development and human rights issue means that this emerging field of study will rapidly gain in importance and should become part of any serious higher education in social and development studies and in international public health. The course will cover essential knowledge and skills in this subject. During this 4-week course the following subjects will be discussed:

Disability models and stereotypes, culture and disability, ICF conceptual framework, experience of having a disability, frequencies and distribution of disability, determinants of disability, including stigma and discrimination, poverty, gender and HIV/AIDS, rights of persons with disabilities, the UN Convention on the Rights of Persons with Disabilities, measurement of disability, disability-relevant research methods, survey methods, examples of disability research and an introduction to community-based rehabilitation.

Onderwijsvorm

Lectures with practical exercises, tutorial groups for problem-based learning, self-study, experiential learning and group assignments

Toetsvorm

Assessment is based on individual assignments and tutorial group work (40%) and an individual written examination (60%). Grades of both parts must at least be 6 or higher.

Literatuur

An e-reader will be available on Blackboard

Doelgroep

Optional course for Master students Management, Policy Analysis and Entrepreneurship in Health and Life Sciences (MPA), specialisation International Public Health within the Master Health Science and specialisation International Public Health within the Master Biomedical Sciences. External students from low and middle- income countries are also encouraged to apply.

Docent(en)	dr. J.N.M. Commandeur
Lesmethode(n)	Hoorcollege
Niveau	500

Doel vak

At the end of this theoretical course, the students are aware of the latest insights of cellular response mechanisms to administered drugs.

Inhoud vak

The following aspects will be studied in the course cellular stress and signaling: role of biotransformation in activation and inactivation of toxicants, chemical reactivity of reactive intermediates with biological macromolecules, cellular and molecular mechanisms leading to toxic effects, factors determining organ-selectivity of toxicants, genetic toxicology and chemical carcinogenesis, necrosis and apoptosis, impairment of cell proliferation and tissue repair, immune-mediated toxicity.

Onderwijsvorm

Lectures, tutorials, assignments and self study.

Toetsvorm

Assignments (5%), presentations (10%), written exam (85%).

Faculteit	Faculteit der Exacte Wetenschappen
Coördinator	dr. J.T.M. Kennis
Docent(en)	dr. J.T.M. Kennis
Lesmethode(n)	Hoorcollege
Niveau	400

Doel vak

Life is, by its very definition, a dynamic quantity. In this course an overview is given of dynamic processes that take place in biomolecules, membranes and cells in relation to biological functionality.

Inhoud vak

The significance of small movements to large-scale and slow reorganizations are being discussed as well the experimental techniques employed.

- DNA processing and dynamics (techniques: optical tweezers, AFM,

tethered particle motion, magnetic tweezers). DNA structure and stability, DNA/RNA polymerase, DNA architectural proteins, DNA repair.

- Protein dynamics (techniques: ultrafast spectroscopy, Infrared and Raman spectroscopy, single-molecule fluorescence). Photoactive proteins, light-driven enzymes, Motor proteins, optogenetics.
- Membrane dynamics and remodeling (techniques AFM, single molecule, electron microscopy). Photosynthesis, crowding and membrane protein diffusion, Neuroimaging.

Onderwijsvorm

Hoorcolleges, literatuur essay, mondelinge presentatie literatuur

Toetsvorm

- Essay (literature or research proposal)
- Oral literature presentation
- written Exam

Entrepreneurship in Health and Life Sciences

Vakcode	AM_470575 ()
Periode	Periode 2
Credits	6.0
Voertaal	Engels
Faculteit	Fac. der Aard- en Levenswetenschappen
Coördinator	prof. dr. E. Masurel
Docent(en)	prof. dr. E. Masurel
Lesmethode(n)	Hoorcollege, Werkgroep
Niveau	500

Doel vak

Students obtain knowledge about and insight in the relevance of entrepreneurship and innovation for their own discipline. Students learn about the processes which are involved in the recognition and exploitation of opportunities, about creating economic and social value and about the nature and role of networks. In addition students gain knowledge of different entrepreneurial processes and the importance of valorisation of (bio)medical findings and business ideas for a knowledge-based economy.

Inhoud vak

This course consists of two tracks: a theoretical track and a practical track. These two tracks run simultaneously.

In the first track you learn about entrepreneurship. Answers are found

on questions such as: What is entrepreneurship? What defines an entrepreneur? What are entrepreneurial opportunities? What is the role of innovation in entrepreneurship? What is corporate social responsibility (CSR)? How can we judge the feasibility of entrepreneurial ambitions?

Simultaneously you work on an assignment (second track). In the first week of this course you search for an innovation in your own discipline (product, service, process etc). Your choice must be approved by the lecturers. The first part of the assignment consists of a description of the innovation which you have chosen. Subsequently, you make a SWOT-analysis and a network analysis of the innovation. Also a paragraph on CSR aspect should be added. The final part of the assignment is your own feasibility study: how would you valorize the innovation to the market?

Onderwijsvorm

Lectures, personal meetings. Each week scientific lectures are given (on entrepreneurship, SWOT-analysis, innovation, CSR etc). These lectures are both the basis for the exam and for the assignment.

Each week the student has a short meeting with his / her supervisor, in order to discuss the progress of his/her assignment.

Toetsvorm

You conduct a written exam and an assignment. Both the exam and the assignment determine 50% of the grade. The exam and the assignment must be of sufficient quality.

Literatuur

To be announced on Blackboard

Doelgroep

Optional course for Master students Management, Policy Analysis and Entrepreneurship in Health and Life sciences (MPA), M-differentiation of the Health, Life & Natural Sciences, Biology, Biomedical Sciences.

Overige informatie

Attendance is compulsory. Prior knowledge: Business Management in Health and Life sciences. For information and application:

Ethics in Life Sciences

Vakcode	AM_470707 ()
Periode	Periode 3
Credits	3.0
Voertaal	Engels
Faculteit	Fac. der Aard- en Levenswetenschappen
Coördinator	prof. dr. J.T. de Cock Buning
Docent(en)	prof. dr. J.T. de Cock Buning
Lesmethode(n)	Hoorcollege, Werkgroep
Niveau	400

Doel vak

To provide a toolbox of ethical instruments to analyze properly moral problems related (to one's own) research in the life sciences

- To acquire conceptual knowledge of the central concepts in applied philosophy and professional ethics
- To challenge an ethical reflection on one's own life science specialization and to open it for an impartial and constructive discussion
- To exercise a team based project to enter, prepare and execute a moral dialogue
- To acquire the necessary skills to handle ethical issues in an accountable manner, as a professional academic beyond one's own inclinations and prejudices

Inhoud vak

Researchers in life sciences generate the knowledge that builds the future of our society. Therefore, professional academics should be accountable for their decisions, experimental designs and presentation of results. In this short course, the principles of justification will be illustrated with cases of technology ethics and medical ethics. The way an ethical review committee on animal research works, is simulated by a role play exercise on an actual research protocol. Finally, as a small group training project, an ethical dialogue is prepared and executed together with another team.

Onderwijsvorm

Lectures, workgroups, group assignment with presentation

Toetsvorm

- Degree of intellectual participation in the workgroups (10%)
- exam (50%) has to be passed
- written and verbal execution of the ethical dialogue (40%)

Literatuur

Available on Blackboard

Vereiste voorkennis

Bsc Biology, Biomedical Sciences, Psychology with profile Biological Psychology or Neuropsychology

Doelgroep

Compulsory course in all FALW Master programmes, except Health Sciences

Overige informatie

Lectures in English, part of the workgroups are in Dutch. All presentations and plenary discussions in English. Attendance is compulsory.

Ethics in Public Health

Vakcode	AM_470805 ()
Periode	Periode 3
Credits	3.0
Voertaal	Engels
Faculteit	Fac. der Aard- en Levenswetenschappen
Coördinator	dr. M.J.P.A. Janssens
Docent(en)	dr. M.J.P.A. Janssens
Lesmethode(n)	Hoorcollege

Doel vak

Analysing and understanding the ethical aspects of public health research, enabling students to make responsible decisions in research

Inhoud vak

Recent case studies will be analyzed concerning topics as life style enhancement, reproductive technologies, health care research, and preventive health care. Three sessions are dedicated to student presentations which will be discussed in plenary sessions. In three other sessions, the lecturer will introduce and discuss actual developments in the ethics of public health:

reproductive technologies;
prevention and life style enhancement;
medical research involving human subjects. Also, throughout the course, attention will be paid to the practical relevance of fundamental ethical-philosophical questions.

Onderwijsvorm

Lectures, workgroups, assignments

Toetsvorm

Essay and active participation

Doelgroep

Compulsory course for master students in Lifestyle and Chronic Disorders

Health, Globalisation and Human Rights

Vakcode	AM_470818 ()
Periode	Periode 2
Credits	6.0
Voertaal	Engels
Faculteit	Fac. der Aard- en Levenswetenschappen
Coördinator	dr. C.W.M. Dedding
Docent(en)	prof. dr. P. Heutink, dr. M.G.B.C. Bertens
Lesmethode(n)	Hoorcollege, Werkgroep
Niveau	500

Doel vak

To acquire knowledge and understanding of the relationship between global public health issues and the global protection of human rights
To analyse how violations of human rights affect health and well-being
To learn methods of human rights assessment in relation to innovations in health technology
To acquire insights into the cultural dimensions of human rights values in relation to public health

Inhoud vak

This course focuses on the human rights issues that are raised around the globe in connection with public health concerns. The course introduces the students to the effects of globalization on health issues, to the relevant UN human rights instruments on health and to the mechanisms to promote and protect these rights. Attention is given to a wide range of human rights topics in which health and well being

play a crucial role. Examples are situations of armed conflict, reproductive rights, migration and refugee issues and childrens rights. Within the context of current globalisation processes the importance of local cultural insights into the human rights & public health interaction will be discussed. During the course students will prepare and participate in a simulation on a human rights assessment of innovations in health technology and discuss relevant scientific literature in study groups. In the exam students will show their creative problem-solving skills applying them to human rights dilemmas in public health.

Onderwijsvorm

Lectures, workgroups, group project, self study

Toetsvorm

Group project, simulation, exam. All parts need to be passed (6.0)

Literatuur

Literature to be announced on Blackboard

Doelgroep

Optional course for students in all differentiations of the Masters Health Sciences, Biomedical Sciences and Management, Policy Analysis and Entrepreneurship in Health and Life Sciences.

Inleiding bioinformatica 2

Vakcode	X_401042 (401042)
Periode	Periode 4
Credits	3.0
Voertaal	Engels
Faculteit	Faculteit der Exacte Wetenschappen
Coördinator	prof. dr. F.J. Bruggeman
Docent(en)	prof. dr. B. Teusink, prof. dr. F.J. Bruggeman, prof. dr. J. Heringa
Lesmethode(n)	Hoorcollege, Practicum
Niveau	300

Doel vak

We kunnen nu de DNA sequentie van ieder menselijk genoom aflezen, maar begrijpen we eigenlijk wel hoe deze genen werken en samen een levend organisme vormen? Bioinformatica richt zich op de vraag wat de biologisch betekenis en functie van DNA sequenties is, en lost dit op met behulp van computationele technieken.

Het vak Inleiding Bioinformatica (I en II) geeft een overzicht van de bioinformatica en de belangrijkste technieken op dit vakgebied. In Inleiding Bioinformatica II worden de belangrijkste aspecten en methoden op het gebied van gen expressie, eiwit bioinformatica, en biologische netwerken behandeld. Aan het eind van deze cursus kunnen studenten de biologische en computationele achtergrond van de technieken begrijpen en zelfstandig een genoom- en sequentie analyse uit te voeren.

Inhoud vak

De volgende onderwerpen komen aan bod:

Theorie:

- Biomoleculaire en genomics databases (genoom, secundaire en tertiaire structuur, afgeleide databases, etc.)
- Algoritmen voor secundaire en tertiaire structuurvoorspelling
- Genexpressie data analyse
- Protein-protein interacties
- Genomics data mining (vinden van functionele relaties, comparative genomics)
- Intracellulaire netwerken

Praktijk opdrachten:

- Eiwit structuur visualiseren en analyseren
- Biologische netwerken
- Genexpressie data analyse

Onderwijsvorm

Hoorcolleges, werkcolleges, praktische opdrachten.

Toetsvorm

50 % praktische opdrachten en 50% tentamen.

Literatuur

Xiong, J., Essential Bioinformatics, Cambridge University Press, 2006, ISBN-13: 978-0521600828.

Vereiste voorkennis

Inleiding Bioinformatica 1 is aanbevolen voorkennis.

Doelgroep

3MNSW, mBio, mMNS-MCD, mMNS-Mpy

Overige informatie

Derdejaars Bachelor student in elke beta of life science discipline (inclusief Medicijnen) mogen instromen.

Docent(en)	dr. ir. H. Vrenken, dr. J.C. de Munck
Lesmethode(n)	Hoorcollege, Practicum
Niveau	300

Doel vak

The main goal of the course is to teach students how to apply basic image processing tools on medical images using MATLAB®. The student will be able to write efficient MATLAB® applications to addresses and solve a range of clinical research questions.

Inhoud vak

Image analysis methods play an increasingly important role in medical science and clinical patient care. This course discusses the most important image analysis techniques and explains how they can be applied. These include image histogram analysis, neighbourhood processing, image fusion, and morphological operations. Rationales for using these techniques are illustrated with examples from several imaging modalities and clinical fields. The student then learns how to apply these techniques practically using MATLAB®. The final mark is the average of the mark obtained at the written examination and the mark obtained at the final practical assignment.

Onderwijsvorm

10 x 3 hours lectures;
10 x 3 hours practicals;
final practical assignment.

Toetsvorm

50% written examination,
50% assignment practical work.
Both should be sufficient to pass the exam.

Literatuur

McAndrew, A. Introduction to Digital Image Processing with MATLAB®. (ISBN 0-534-40011-6). This book will be made available through the lecturers at a price of around 60 euros.

Omics-procedures in molecular clinical Diagnostics

Vakcode	X_432766 ()
Periode	Periode 5
Credits	6.0
Voertaal	Engels
Faculteit	Faculteit der Exacte Wetenschappen
Coördinator	dr. H. Lingeman

Docent(en)	dr. H. Lingeman
Lesmethode(n)	Hoorcollege
Niveau	400

Doel vak

The primary objective of this course is highlighting the various omics-approaches that are used in drug- and biomarker discovery.

Inhoud vak

Omic-approaches involve the comparison of metabolomes, proteomes and genomes between control and test groups to find differences in their profiles. Those differences may be correlated to the disease being studied in clinical biomarker discovery or changes in the metabolic output in toxicology studies. During the course the fundamentals and applications of omic-based techniques will be discussed. The focus will be on the separation (e.g. chromatography, electrophoresis), detection/identification (e.g. MS, NMR, Spectroscopic) and chemometric procedures to unravel complex biological and clinical samples

Parameter Estimation Applied to Medical and Biological Sciences

Vakcode	X_432631 (432631)
Periode	Periode 4
Credits	6.0
Voertaal	Engels
Faculteit	Faculteit der Exacte Wetenschappen
Coördinator	dr. J.C. de Munck
Docent(en)	dr. J.C. de Munck
Lesmethode(n)	Hoorcollege
Niveau	500

Doel vak

The course treats the theory of parameter estimation problems in general, but the theory is illustrated extensively by examples from medical and biological sciences and brain imaging (fMRI and MEG/EEG) in particular. Linear and non-linear regression analysis is treated, as well as confidence intervals and significance testing. The goal of the course is to provide insight into the theory of parameter estimation and to develop a critical attitude towards its application and interpretation in order to avoid inconsistent and improper use of the theory.

Inhoud vak

Linear-non linear parameter models, basic matrix-vector algebra, maximum likelihood principle, correlated-uncorrelated noise, OLS, GLS, nuisance parameters, linear (time invariant) filters, t-test, F-test, confidence intervals, fMRI data model, missing data, MEG/EEG source localisation. These topics are treated in the form of a series of lectures alternated with exercises.

Extra onderwerpen: L1 en L2 norms.

Onderwijsvorm

Hoorcollege

Toetsvorm

Written exam.

Literatuur

Syllabus and scientific papers.

Policy, Politics and Participation

Vakcode	AM_470589 ()
Periode	Periode 2
Credits	6.0
Voertaal	Engels
Faculteit	Fac. der Aard- en Levenswetenschappen
Coördinator	A. Roelofsen

Docent(en)	dr. B.J. Regeer, dr. J.F.H. Kupper, prof. dr. J.E.W. Broerse
Lesmethode(n)	Hoorcollege, Werkgroep
Niveau	500

Doel vak

To further deepen your analytic skills with respect to the assessment of a specific societal problem;

To acquire further insight into the practice of interactive research;

To acquire further insights into specific methods and techniques of interactive research;

To strengthen the skills to design an interactive research project

To practice skills in data collection and analysis;

To learn to set up valid lines of argumentation;

To improve your communication skills;

To improve your skills in working effectively in a project team, through team building, team analysis and feedback.

Inhoud vak

In this course you get the chance to gain experience in the practical implementation of methodologies for interactive research. In a four week policy project you will both improve your focus group research skills and deepen your understanding of the relevant theoretical concepts in the areas of policy studies, science and technology studies and democracy theory. In a group of about ten students you will participate in a real interactive research project which is executed at the Athena institute. In this project you will be trained in and practice various skills for data collection (such as focus group design and facilitation) and data analysis (such as qualitative content analysis).

Specific attention is paid to your personal interactive research skills.

At the end of the course, you

prepare a policy report to present your findings. In an oral

presentation your team will highlight the main results of your analysis

and defend the recommendations you propose.

Onderwijsvorm

Lectures, training workshops, project assignment

Toetsvorm

Individual evaluation based on personal performance in the project group and assessment of various group products (report and presentation). All parts need to be passed.

Literatuur

To be announced on Blackboard

Doelgroep

Optional course for Master students Management, Policy Analysis and Entrepreneurship in Health and Life sciences (MPA), Societal differentiation of the Health, Life & Natural Sciences.

Overige informatie

Basic knowledge of (interactive) policy processes, policy analysis and relevant research skills are required.

Attendance is compulsory.

Praktijk I

Vakcode	O_MLPRAKI ()
Periode	Semester 1, Semester 2
Credits	15.0
Voertaal	Nederlands
Faculteit	Faculteit der Psychologie en Pedagogiek
Niveau	500

Doel vak

De student maakt kennis met het onderwijs in de praktijk, verzorgt lessen en is betrokken bij andere leerlinggerichte activiteiten. Hij kan binnen de context van de school theoretische inzichten praktisch vormgeven en weet de praktijkomgeving te benutten om aan eigen ontwikkelpunten te werken.

De student werkt samen met anderen binnen en buiten de school en kan zijn functioneren als teamlid beschrijven en toelichten.

Inhoud vak

Het totale aantal klassencontacturen dat een student moet maken tijdens Praktijk 1 en 2, bedraagt tenminste 250. Tijdens deze uren observeert of verzorgt de student lessen en neemt deel aan andere leerlinggerichte activiteiten. Hij/zij geeft tenminste 120 lessen, waarvan minimaal 40 lesuren in de bovenbouw havo/vwo.

De verdeling en fasering van dit aantal uren over Praktijk 1 en 2 wordt in overleg met de begeleider op school bepaald. In Praktijk 1 ligt de nadruk op het observeren en het onder begeleiding voorbereiden, uitvoeren en evalueren van lessen.

Dit opleidingsonderdeel loopt parallel aan vakdidactiek 1 en algemene didactiek en pedagogiek 1, waardoor een goede wisselwerking mogelijk is tussen theorie en praktijk.

Toetsvorm

Praktijk 1 wordt door de schoolbegeleider beoordeeld aan de hand van een checklist. De schoolbegeleider doet daarbij een voorstel dat door de instituutsbegeleider moet worden onderschreven.

Vereiste voorkennis

Dit vak is alleen te volgen als onderdeel van de universitaire lerarenopleiding

Praktijk II

Vakcode	O_MLPRAKII ()
Periode	Ac. Jaar (september), Semester 1, Semester 2
Credits	15.0
Voertaal	Nederlands
Faculteit	Faculteit der Psychologie en Pedagogiek
Niveau	500

Doel vak

De student kan, als docent-in-opleiding, verantwoordelijkheid dragen voor het zelfstandig voorbereiden, uitvoeren en evalueren van lessen in de onder- en bovenbouw van het Havo/VWO. Hij kan tevens een bijdrage

leveren aan schoolbrede activiteiten. Hij kan binnen de context van de school theoretische inzichten praktisch vormgeven en weet de praktijkomgeving te benutten om aan eigen ontwikkelpunten te werken. Hij kan reflecteren op opgedane ervaringen en verworven inzichten en deze op dusdanige manier beschrijven dat zij inzichtelijk worden voor anderen. De student toont zich professioneel in de samenwerking met anderen binnen en buiten de school en kan zijn functioneren als teamlid beschrijven en toelichten.

Inhoud vak

Het totale aantal klassencontacturen dat een student moet maken tijdens Praktijk 1 en 2, bedraagt tenminste 250. Tijdens deze uren observeert of verzorgt de student lessen en neemt deel aan andere leerlinggerichte activiteiten. Hij/zij geeft tenminste 120 lessen, waarvan minimaal 40 lesuren in de bovenbouw havo/vwo.

De verdeling en fasering van dit aantal uren over Praktijk 1 en 2 wordt in overleg met de begeleider op school bepaald. Tijdens Praktijk 2 draagt de student verantwoordelijkheid voor een of meer klassen. Hij bereidt het onderwijs voor, voert het uit en evalueert het. Hij werkt hierbij nadrukkelijk samen met sectiegenoten en andere collega's binnen de school en is zich bewust van de context waarin zijn lessen plaatsvinden. In het portfolio doet hij verslag van zijn functioneren als teamlid en collega in de school.

Dit opleidingsonderdeel loopt parallel aan vakdidactiek 2 en algemene didactiek en pedagogiek 2, waardoor een goede wisselwerking mogelijk is tussen theorie en praktijk.

Toetsvorm

Praktijk 2 wordt door de schoolbegeleider beoordeeld aan de hand van een checklist waarop het eindcijfer voor de praktijk wordt gebaseerd. De schoolbegeleider doet daarbij een voorstel dat door de instituutsbegeleider moet worden onderschreven.

Tevens beoordeelt schoolbegeleider het functioneren van de student als teamlid en collega op basis van de door de student uitgevoerde portfolio-opdrachten.

Vereiste voorkennis

Dit vak is alleen te volgen als onderdeel van de universitaire lerarenopleiding.

Professionele ontwikkeling en onderzoek I

Vakcode	O_MLVPOOI ()
Periode	Semester 1, Semester 2
Credits	3.0
Voertaal	Nederlands
Faculteit	Faculteit der Psychologie en Pedagogiek
Coördinator	drs. D.T.T. Kamsma
Docent(en)	prof. dr. J.A. van der Schee, dr. H.H. Schalk, W. Maas
Lesmethode(n)	Hoorcollege, Werkcollege

Doel vak

De student kan systematische reflecteren op het eigen handelen in de onderwijspraktijk en daardoor richting geven aan de eigen professionele ontwikkeling.

De student kan een onderzoeksvraag formuleren voor een onderzoek aan zijn/haar eigen onderwijspraktijk, deze vraag inbedden in een theoretisch kader en een opzet maken voor de uitvoering van het onderzoek.

Inhoud vak

Dit vak bestaat uit twee delen: een reflectiedeel en een onderzoeksdeel.

Het reflectiedeel krijgt vorm en inhoud in zogenaamde peergroepbijeenkomsten. Hierin reflecteert de studenten samen met anderen op zijn/haar handelen in de praktijk en leert daaruit ontwikkelpunten af te leiden, acties te formuleren en deze te evalueren. Verschillende instrumenten en methodes worden gebruikt (logboek, reflectiecirkel, intervisie,...) om de student in staat te stellen de complexiteit van de onderwijspraktijk te doorgronden en hiervan te leren.

In het onderzoeksdeel wordt een opzet gemaakt van een praktijkonderzoek.

In dit onderzoek diept de student één of meer vraagstukken uit de (eigen) onderwijspraktijk uit, waarbij een onderzoeksvraag ingebed wordt in een theoretisch kader en op één of enkele scholen empirisch materiaal wordt verzameld. In plenaire bijeenkomsten komen onderwerpen aan de orde als het formuleren van de probleemstelling en de onderzoeksvraag, het verkennen van de literatuur en het verzamelen van de data. Daarnaast kan de student beroep doen op individuele begeleiding rondom zijn/haar onderzoek. Dit alles mondt uit in een eerste onderzoeksformat voor het praktijkonderzoek dat vervolgens in het vak Professionele Ontwikkeling en Onderzoek 2 uitgevoerd, gepresenteerd en geëvalueerd wordt.

Onderwijsvorm

colleges, werkgroepbijeenkomsten en individuele begeleiding van het onderzoek door instituutsbegeleiders.

Toetsvorm

Uitvoeren van opdrachten.

Literatuur

Een literatuurlijst wordt verstrekt aan het begin van de opleiding.

Vereiste voorkennis

Dit vak is alleen te volgen als onderdeel van de universitaire lerarenopleiding.

Overige informatie

Voor alle onderdelen geldt een aanwezigheidsplicht.

Professionele ontwikkeling en onderzoek II

Vakcode	O_MLVPOOII ()
Periode	Ac. Jaar (september), Semester 1, Semester 2
Credits	6.0
Voertaal	Nederlands

Faculteit	Faculteit der Psychologie en Pedagogiek
Coördinator	drs. D.T.T. Kamsma
Docent(en)	prof. dr. J.A. van der Schee, dr. H.H. Schalk, D.T.A. Wols, W. Maas
Lesmethode(n)	Hoorcollege, Werkcollege
Niveau	500

Doel vak

De student kan een praktijkonderzoek opzetten, uitvoeren en hierover rapporteren.

Inhoud vak

In het praktijkonderzoek diept de student één of meer vraagstukken uit de (eigen) onderwijspraktijk uit. Hij of zij doet dat door het opzetten, uitvoeren en evalueren van een op de eigen onderwijspraktijk gericht onderzoek waarbij op één of enkele scholen empirisch materiaal wordt verzameld. Aan de hand van de opzet die gemaakt is tijdens de module Professionele Ontwikkeling en Onderzoek 1 ontwerpt de student onderzoeksinstrumenten om empirisch gegevens te verzamelen voor het beantwoorden van de onderzoeksvraag en voert hij/zij het onderzoek uit. In een artikel voor een vaktijdschrift voor leraren rapporteert hij/zij over het onderzoek waarin aan de orde komen vraagstelling, relevantie, verankering in bestaande theorie, gebruikte instrumenten, data, conclusie en discussie. De student presenteert ook zijn/haar onderzoek tijdens de Onderwijsresearchdag.

Onderwijsvorm

Onderzoek, verplichte deelname aan colleges praktijkonderzoek, werkgroepbijeenkomsten, individuele begeleiding door instituutsbegeleiders.

Toetsvorm

De rapportage van het praktijkonderzoek vindt plaats in de vorm van een artikel voor een vaktijdschrift voor leraren. Dit artikel wordt gezamenlijk beoordeeld door de eerste begeleider en tweede lezer, die wordt aangezocht door de eerste begeleider. Presentatie van het onderzoek op de Onderwijsresearchdag is voorwaarde om dit studieonderdeel te kunnen afronden.

Literatuur

Een literatuurlijst wordt verstrekt aan het begin van de opleiding.

Vereiste voorkennis

Dit vak is alleen te volgen als onderdeel van de universitaire lerarenopleiding.

Om dit vak te volgen moet het vak Professionele Ontwikkeling en Onderzoek 1 met goed gevolg zijn afgelegd.

Overige informatie

Voor alle onderdelen geldt een aanwezigheidsplicht.

Qualitative and Quantitative Research Methods

Vakcode	AM_470582 ()
Periode	Periode 1

Credits	6.0
Voertaal	Engels
Faculteit	Fac. der Aard- en Levenswetenschappen
Coördinator	dr. H. Wels
Docent(en)	dr. H. Wels, prof. dr. J.T. de Cock Buning, dr. J.F.H. Kupper
Lesmethode(n)	Hoorcollege, Werkgroep, Computerpracticum
Niveau	400

Doel vak

Understanding the differences between beta- and gamma research
 To acquire insight and understanding of a transdisciplinary research process. This includes knowledge of the character of and need for transdisciplinary approaches, and their advantages and disadvantages
 To acquire insight into various quantitative and qualitative research methods and their underlying theoretical concepts
 To understand the relative strengths and weaknesses of the various research methods
 To know how to interpret quantitative and qualitative findings
 To acquire insight and understanding of the possibilities to integrate quantitative and qualitative research information
 To be able to make an adequate transdisciplinary research design for the investigation of a specific problem.

Inhoud vak

Contemporary societies increasingly face complex social problems, like climate change, HIV/ AIDS or ethnic and religious diversity . These complex problems involve a variety of social actors: policy-makers, professionals, NGOs, industry, science and of course the public at large. Addressing such complex issues demands a transdisciplinary approach that investigates, analyzes and integrates the positions and knowledge of different actors. This course offers an (advanced) introduction to various research methods used in transdisciplinary research: questionnaires, systematic observations using all the senses, surveys and statistics, semi-structured in-depth interviews, as well as several interactive and participatory methods. These methods are commonly used in transdisciplinary research into complex problem contexts, communication, and opportunities for intervention. Strengths and weaknesses of each research method and technique will be discussed, as well as its possibility to be applied in different societal contexts. Throughout the course, you will apply theoretical knowledge about the various research methodologies in the training of different qualitative and quantitative methods, and in making a research design. In small groups, students are trained in: (1) qualitative research methods such as semi structured interviews and observation techniques, (2) quantitative research methods such as questionnaires, 3) analysis of the data, and (4) writing a transdisciplinary research design.

Onderwijsvorm

Lectures, training workshops, self study

Toetsvorm

Group assignment (50%) and exam (50%). Both parts need to be passed (6).

Literatuur

Reader or book (details will be announced on Blackboard)

Doelgroep

Compulsory course in the Master programme Management, Policy Analysis and Entrepreneurship for the Health and Life Sciences (MPA) and compulsory course within the Science communication- and Societal differentiations of Health, Life and Natural Sciences Masters programmes.

Overige informatie

Attendance of training workshops is compulsory. For further information please contact harry.wels@falw.vu.nl.

Science and Communication

Vakcode	AM_470587 ()
Periode	Periode 1
Credits	6.0
Voertaal	Engels
Faculteit	Fac. der Aard- en Levenswetenschappen
Coördinator	dr. B.J. Regeer
Docent(en)	dr. B.J. Regeer, dr. J.F.H. Kupper, C.A.C.M. Pittens MSc
Lesmethode(n)	Hoorcollege, Werkgroep
Niveau	500

Doel vak

- Gain theoretical insight in the relationship between science and society,
- Gain insight in the role of science communication in this relationship,
- Acquire knowledge of different theories and models of science communication,
- Acquire knowledge of different strategies, media and activities for science communication,
- Learn how to apply theoretical concepts to real-life examples,
- Development of practical skills for science communication (e.g. writing, discussing).

Inhoud vak

Science is all around us and shapes our lives in many different ways. From the vaccines you need for travelling abroad, to the technological devices you use on a daily basis. At the same time, society shapes the development of science and technology. Science and society influence each other continuously; they communicate. Students of Science Communication are expected to become experts in understanding and designing interaction between science and society. In order for this interaction to be fruitful and valuable for both science and society, it is important to gain in-depth knowledge about the theoretical basis of the field of science communication and understand communication processes at the core of several interfaces; e.g. the communication between scientists from different disciplines, between different sciences and their stakeholders, and between science and the public. This course provides a broad basis in the field of science communication by addressing the main areas of science communication and by discussing and challenging several core concepts within this field. Students are

invited to explore some issues in greater depth and active participation in lectures and workgroups is required.

Onderwijsvorm

Lectures and seminars on theory and practice of science communication.

Toetsvorm

Assessment based on an individual essay (30%), group assignment (10%) and written examination (60%). For all parts of the assessment a pass-grade needs to be obtained.

Literatuur

To be announced

Doelgroep

Compulsory course for Master students in the C-specialisation (Science Communication) of the Masters Biomedical Sciences, Biology and any of the natural sciences.

Optional course for Master students Management, Policy Analysis and Entrepreneurship in Health and Life Sciences (MPA), M-specialisation of the Masters Biomedical Sciences, Biology, and any of the natural sciences.

Overige informatie

Students in Health, Life and Natural sciences who are interested in other master courses in Science Communication are strongly advised to enrol for this course, For information and application:

c.a.c.m.pittens@vu.nl.

Science in Dialogue

Vakcode	AM_1002 ()
Periode	Periode 2
Credits	6.0
Voertaal	Engels
Faculteit	Fac. der Aard- en Levenswetenschappen
Coördinator	dr. J.F.H. Kupper
Docent(en)	dr. J.F.H. Kupper
Lesmethode(n)	Werkgroep, Hoorcollege
Niveau	500

Doel vak

To gain knowledge and insight into:

- the basic concepts and issues in the understanding of science-society interactions, both from a philosophical and communication science perspective
- the nature and course of interpersonal and group communication processes relevant to the formal and informal dialogue between science and society
- the nature and form of dialogical science communication, aimed at mutual understanding and learning

To acquire or improve:

- the individual student's skills for effective interpersonal communication
- the individual student's skills for the design and facilitation

of the science-society dialogue

Inhoud vak

This course examines the public character of scientific controversy and focuses on the communicative aspects of a fruitful science-society dialogue. At the dawn of the 21st century, science, and particularly fields that combine science and engineering such as nanotechnology and synthetic biology, holds a great promise for the progress of our societies. At the same time, these developments are controversial. They lead to a variety of concerns related to risks, benefits and wider moral issues. Nanotechnology creates materials with novel characteristics that help us, but may also contain risks for health and environment.

Synthetic biology develops new biological systems that may be very useful, but radically change the nature and meaning of life. Clearly, advances in science do not always match the needs, desires and expectations of society. On the other hand, parts of society might not always appreciate the nature and scope of scientific findings. For a fruitful relationship between science and society, a constructive science-society dialogue is necessary.

This course offers advanced lectures on the basic concepts and issues of dialogical science communication: communication, learning, dialogue, understanding, controversy, democracy. A series of workshops and small group assignments presents communicative tools and spaces such as discussion games, science theatre and multimedia platforms that can be used to design and facilitate science-society interactions. Training workshops will focus on improving the students' individual communication and facilitation skills. The students' individual learning curve as a science communicator and facilitator is monitored by means of a personal development plan. The course is completed with an individual essay assignment about the sense and nonsense of the science-society dialogue.

Onderwijsvorm

Guest lectures, Interactive lectures, Training workshops, Individual and Group Assignments, Personal Development Plan

Toetsvorm

Individual Assignments, Small Group Assignments, Personal Reflection Log

Literatuur

Articles and chapters are made available on Blackboard

Doelgroep

Optional course in the MSc specialization Science Communication

Overige informatie

Independence and a cooperative attitude is expected. Attendance to training workshops is indispensable.

Science Journalism

Vakcode	AM_471014 ()
Periode	Periode 2
Credits	6.0
Voertaal	Engels
Faculteit	Fac. der Aard- en Levenswetenschappen
Coördinator	dr. J.F.H. Kupper

Docent(en)	dr. J.F.H. Kupper, W.J. Breukers MSc, dr. M.J.W. Bos
Lesmethode(n)	Hoorcollege, Werkgroep, Computerpracticum
Niveau	500

Doel vak

To acquire knowledge and insight into:

- the popularization of natural scientific knowledge and the use of different media
- the criteria for effective science journalism with respect to diverse media
- the role of science journalists in the debate about knowledge in society

To acquire skills in:

- writing popular scientific texts for different genres such as news, background and interview
- designing science communication for different media such as newspaper, radio and internet

Orientation to the professional practice of science journalism

Inhoud vak

This course teaches the basic principles of science journalism. A series of interactive lectures reviews both the practical as well as the theoretical aspects of science journalism. Topics that are discussed are the translation of science to a language that is both compelling and understandable, the role of journalism in the interaction between science and society, images of science in the media and the ethics of science journalism. The interactive lectures invite you to take your own defensible position with regard to these issues.

Guest lectures provide insight into the professional practice of science journalists. The guest speakers work as freelancer, editor or producer at diverse science media, such as newspapers (NRC, Volkskrant), magazines (NWT), internet (Noorderlicht) and radio (Labyrint).

Finally, the course trains specific skills that you need as a science journalist, such as popular writing, interviewing, conceptual analysis and program design.

Onderwijsvorm

Lectures and seminars on theory and practice of science journalism and writing skill training. Considerable time is set aside for writing popular science articles. The assignments are assessed by lecturers and fellow students (peer-review process).

Toetsvorm

Individual Assignments, Small Group Assignments, Personal Reflection Log

Literatuur

Burger, P. & De Jong, J. (2009). Handboek Stijl. Groningen: Noordhoff.

Available at the VU bookshop

Additional literature made available via Blackboard

Doelgroep

All Master students with a Beta-Bachelor degree. Students taking this course as part of their C-differentiation within FALW or FEW will have precedence over other students. Students from other faculties and or universities need to get formal consent from the course co-ordinator (Frank Kupper) before enrolment.

Overige informatie

Course is taught in Dutch. More information: f.kupper@vu.nl.

Science Museology

Vakcode	AM_470590 ()
Periode	Periode 3
Credits	6.0
Voertaal	Engels
Faculteit	Fac. der Aard- en Levenswetenschappen
Coördinator	dr. B.J. Regeer
Docent(en)	dr. B.J. Regeer, drs. ir. M.G. van der Meij
Lesmethode(n)	Hoorcollege, Werkgroep
Niveau	500

Doel vak

Gain insight in the role of museum exhibits in the field of science communication

Apply theoretical notions of science communication, science education and exhibit design to advise on adjustments and/or development of exhibitions

Apply theoretical notions of science communication and science education to perform science communication research in museum settings

Apply qualitative and quantitative research methods to design/perform/report on research project in museum settings

Inhoud vak

This course is on the role of science museums/centers, zoos and natural history museums in science communication. You will get familiar with theories of science communication and informal science education in museum setting and will be introduced to different educational methods as well as styles of communication, different approaches to exhibit design and development and different methods of research and evaluation of exhibitions.

Guest speakers give insight into their profession as science communicators in museums and science centers, as researchers in the field of museology and/or as professionals in developing informal science learning programs. Through several assignments you are encouraged to combine theory and practice. The assignments are developed in collaboration with museums and science centers, such as NEMO, Naturalis and Artis.

Onderwijsvorm

Lectures, workgroups, assignments and home-study

Toetsvorm

Assignments (40%), presentations (10%), written exam (50%)

For all assignments, presentations and exam a pass-grade must be obtained.

Literatuur

Reader, provided at start of course

Vereiste voorkennis

Bachelor in any of the Beta Sciences

Doelgroep

Optional course in the C-differentiations (Science Communication) of most of the two year master programs of the FALW and FEW faculties

Scientific Writing in English

Vakcode	X_400592 (400592)
Periode	Periode 1, Periode 2, Periode 3, Periode 4, Periode 5, Periode 6
Credits	3.0
Voertaal	Engels
Faculteit	Faculteit der Exacte Wetenschappen
Lesmethode(n)	Hoorcollege, Werkcollege
Niveau	400

Doel vak

The aim of this course is to provide the writing student with the essential linguistic means for producing English academic texts which are effective, idiomatically and stylistically appropriate and grammatically correct.

Inhoud vak

The initial focus in the course lies on the form of scientific texts in the Exact Sciences:

- Abstract (or summary)
- Introduction
- Methods
- Results
- Discussion

General course outline

Introducing the topics

- Academic and technical writing in English
- The characteristics of different kinds of scientific texts
- How scientific writing is judged and assessed
- Where do you find your information and how do you present it?
- How to avoid committing plagiarism

Who am I writing for? What do I want to say?

- Your readership
- Key parts of an academic article: title, abstract, introduction, methods, results and discussion

Writing the actual article

- Paragraph and sentence construction: how do I link paragraphs together?
- Writing simple and complex sentences. Active and passive sentences.
- Argumentation : how do I put an argument? How do I frame my own opinion?

Should I use "I" or "we"?

Writing correct English

- Use of apostrophes and colons
- Word order, verb tenses, time and tense
- Avoiding mistakes typically made by Dutch writers
- Common spelling mistakes

You will be making considerable use of peer assessment: examining fellow students' written work and giving them feedback. This method provides useful insights into how a text might be improved. The process of providing someone else with feedback on their text is something that you will find very instructive.

Onderwijsvorm

The course is focused on self-tuition. The plenary sessions concentrate on the process of writing and the product of writing. Homework is part of the course. With each topic, participants work through a phased series of exercises that usually conclude with the requirement to write a short piece of text. The instructor will append extensive written remarks to this text.

Toetsvorm

There will be no examination. However, students will receive their credits only when they have participated in all classes (presence is obligatory) and also when they have handed in the assignments satisfactorily. Students will receive a 'pass' when they have finished the course.

Literatuur

For this course you need the book *Effective Scientific Writing: an advanced learner's guide to better English* (A. Bolt & W. Bruins, ISBN 978 90 8659 6171). This book can be obtained at the VU bookstore, which is located in the VU main building. The costs are € 27,95 per book. For questions contact the Taalcentrum-VU at 020 - 598 9804.

Vereiste voorkennis

Bachelor Exact Sciences

Doelgroep

Optional for mAI, mCS, mIS, mBIO, mPDCS, mCh, mDDS, mPhys.

Overige informatie

Registration for this course is only possible at the Educational Office of the Faculty of Exact Sciences. The usual registration deadlines are applicable, except for period 1. Registration for period 1 is possible until the 24th of August 2012.

Opening hours and contact information can be found here:

<http://www.few.vu.nl/en/about-faculty/faculty-services/educational-office/index.asp>

Period 1 Optional: mAI, mCH, mCS, mDDS, mIS, mPDCS

Period 2 Optional: mAI, mCH, mCS, mDDS, mIS, mPDCS

Period 3 Compulsary: mMNS

Period 3 Optional: mAI, mCS, mCh, mDDS, mIS, mPDCS, mPhys-AMEP, mPhys-PLH, mPhys-PPAP

Period 4 Compulsary: mMath, mBA, mSFM

Period 4 Optional: mAI, mCH, mCS, mDDS, mIS, mPDCS, mPhys-AMEP, mPhys-PLH, mPhys-PPAP

Period 5 Optional: mAI, mCH, mCS, mDDS, mIS, mPDCS, mPhys-AMEP, mPhys-PLH, mPhys-PPAP

Co-ordinator: drs J.K.A. Meijer

Signal Transduction in Health and Disease

Vakcode	X_432535 (432535)
Periode	Periode 2
Credits	6.0
Voertaal	Engels
Faculteit	Faculteit der Exacte Wetenschappen
Coördinator	prof. dr. M.J. Smit
Lesmethode(n)	Hoorcollege
Niveau	600

Doel vak

At the end of this theoretical course, the students are aware of the latest insights of cellular signal transduction in both healthy and pathological conditions.

Inhoud vak

This course will link human genetic variation (somatic and inherited mutations) to the development of disease and will focus on pathological signaling, mutant signaling proteins in disease and possible treatment of resulting disease (small compounds, biologicals, gene therapy). Modern pharmacological concepts, including constitutive receptor activity, receptor regulation, allosteric modulation and dimerization will be addressed in light of signal transduction in health and disease. A special focus will be on signal transduction resulting in pathologies such as Alzheimer, Parkinson's disease, inflammatory diseases and cancer.

Onderwijsvorm

Lectures, self-study.

Students will do a case study in groups on a receptor family linked to disease. Molecular mechanism underlying pathology will be addressed and presented.

Toetsvorm

Assignments and presentation, written exam.

Literatuur

Marks e.a., Cellular Signal Processing. Garland Sci (ISBN 0-8153-4215-2).

Papers available on Blackboard.

Vereiste voorkennis

Bachelor Biology, Medical Biology, Pharmaceutical Sciences, Medical Natural Sciences, Biomolecular Science portal course or equivalent

Doelgroep

Soft Condensed Matter and Biological Physics

Vakcode	X_420167 (420167)
Periode	Periode 2
Credits	6.0
Voertaal	Engels
Faculteit	Faculteit der Exacte Wetenschappen
Coördinator	prof. dr. ir. G.J.L. Wuite
Docent(en)	prof. dr. ir. G.J.L. Wuite
Lesmethode(n)	Hoorcollege
Niveau	400

Doel vak

To provide insight into the physics of biological systems and soft condensed matter. In addition we will discuss and illustrate recent examples of the scientific literature in this field.

Inhoud vak

- The building blocks of cells.
- Statistical physics applied to soft-condensed matter.
- Random Walks, Friction and Diffusion.
- Life at low Reynolds number.
- Entropic forces at work.
- Chemical forces & self-assembly.
- The cytoskeleton, a semiflexible, crosslinked polymer network.
- Enzymes and molecular machines.
- Molecular motor proteins, the lorries in our cells.

Onderwijsvorm

Lectures, and self-study.

Toetsvorm

Homework, Scientific literature presentations and an exam.

Literatuur

Nelson, P., Biological Physics, Energy, Information, Life. New York: W.H. Freeman and Company, 2004 (ISBN 0-7167-4372-8).

Vakdidactiek Natuurkunde I

Vakcode	O_MLVDNAI ()
Periode	Semester 1, Semester 2
Credits	3.0
Voertaal	Nederlands
Faculteit	Faculteit der Psychologie en Pedagogiek
Coördinator	dr. E. van den Berg
Docent(en)	dr. E. van den Berg
Lesmethode(n)	Werkcollege
Niveau	500

Doel vak

De student kan vakinhoudelijke en vakdidactische kennis, vaardigheden en inzichten vertalen naar de eigen vaklessen.

Inhoud vak

Tijdens de vakdidactiekcolleges maakt de student kennis met de inhoud en didactiek van het schoolvak en leert deze inzichten in de praktijk vorm te geven. Er is aandacht voor vakspecifieke kennis en vaardigheden en de voor het schoolvak relevante ICT-toepassingen. In het vakdidactiekprogramma vindt eveneens een vertaling plaats van algemeen didactische thema's naar het vak. De leservaringen op school spelen hierbij een belangrijke rol.

Onderwijsvorm

Werkcolleges

Toetsvorm

Beoordeling van het portfolio

Literatuur

Een literatuurlijst wordt verstrekt aan het begin van de opleiding

Vereiste voorkennis

Dit vak is alleen te volgen als onderdeel van de universitaire lerarenopleiding

Verdieping

Vakcode	O_MLVERD ()
Periode	Semester 1, Semester 2
Credits	3.0
Voertaal	Nederlands
Faculteit	Faculteit der Psychologie en Pedagogiek
Lesmethode(n)	Hoorcollege, Werkcollege
Niveau	500

Doel vak

De student verdiept zich op een onderdeel binnen zijn schoolvak of cluster.

De student is zich bewust van zijn rol als docent in een multiculturele samenleving.

De student kan de verschillende aspecten van diversiteit en multiculturaliteit in het onderwijs benoemen en aangeven hoeverre deze aspecten in zijn of haar eigen schoolpraktijk een rol spelen.

Inhoud vak

Binnen de clusters en vakken worden (verplichte) verdiepingsmodulen aangeboden. Daarnaast volgt elke student het onderdeel multiculturaliteit, waarin een aantal aspecten van onderwijs voor een multiculturele samenleving aan de orde komen:

1. Wat betekent identiteitontwikkeling in het kader van een multiculturele samenleving?
2. Wat is de zin en onzin van intercultureel onderwijs?
3. Wat zijn de verschillende thematieken van diversiteit en multiculturaliteit in de klas?
4. Wat is er bekend uit onderzoek over diversiteit, cultuur, etniciteit in de onderwijspraktijk?

Onderwijsvorm

Hoorcollege, werkcollege.

Toetsvorm

Bespreking van een casus.

Literatuur

Syllabus met artikelen wordt verstrekt.

Voortgezette Biostatistiek

Vakcode	X_401078 ()
Periode	Periode 4
Credits	3.0
Voertaal	Nederlands
Faculteit	Faculteit der Exacte Wetenschappen
Coördinator	dr. W.N. van Wieringen
Docent(en)	dr. W.N. van Wieringen
Lesmethode(n)	Hoorcollege, Werkcollege
Niveau	400

Doel vak

Het bekend raken met statistische begrippen en technieken die een rol spelen in het modelleren en analyseren van processen op het moleculaire niveau van de cel. Onder andere Markov modellen, regressie modellen in hoog-dimensionale context, en Gaussische graphische modellen komen aanbod.

Naast het modelleren wordt aandacht besteed aan het schatten van de model parameters aan de hand van data. Uiteindelijk dient de student zelfstandig bovengenoemde statistische analyse uit te kunnen voeren alsmede die van derden kritisch te beoordelen.

Inhoud vak

In het eerste deel van het college staat het modelleren van de DNA sequentie centraal. Resulterende modellen worden aangewend om bijv. de exon-intron structuur van een gen te ontrafelen. Maar ook om de evolutie van het DNA te beschrijven, en phylogenetische bomen (afstammingsbomen) te reconstrueren.

In het tweede deel wordt hoogdimensionaleit geïntroduceerd, i.e., een klein aantal samples waarvan een groot aantal eigenschappen gemeten is. Dit gooit het traditionele paradigma van de statistiek op z'n kop. We zullen laten zien hoe met hoog-dimionaliteit wordt omgegaan ten einde mbv een zo simpel mogelijk model een phenotype te voorspellen. Alsook hoe de topologie van een biologisch pathway achterhaald kan worden. Alle methoden worden geïllustreerd mbv voorbeelden afkomstig uit de moleculaire biologie.

Onderwijsvorm

Combinatie van hoor- en werkcollege.

Toetsvorm

Huiswerkopdrachten en schriftelijk tentamen.

Literatuur

College slides plus artikelen die op het college bekend gemaakt worden.

Vereiste voorkennis

Aanbevolen voorkennis: Biostatistiek 1 en 2 voor MNW.

Doelgroep

3MNW
